The Netvoyager Neterm thin client desktops are the ideal method to deliver applications on-demand using server-based computing.

Designed with simplicity in mind, suitable for delivering office and administrative applications seamlessly.

The Neterm LX1000 is a powerful thin client desktop solution that is suitable task-orientated applications and terminal connectivity. The LX1000 provides all this in a small desktop device which is remotely manageable.

As standard the Neterm LX1000 includes remote session support for Microsoft, Citrix, X11 servers, SSH and terminal emulation, security and manageability in a very small desktop footprint. The Neterm LX1000 can be mounted on a desk or mouted to the back of a monitor with the built-in VESA adapter.

The Neterm LX1000 offers unparalleled expansion using USB ports and legacy port support. The Neterm, like all other Netvoyager thin client desktops are remotely managed using the built-in management features through a remote browser as well as the Netvoyager InFocus enterprise management tool.

The Netvoyager Neterm LX1000 is the perfect single desktop strategy to access homogenous networks with multiple systems such as Windows and Unix systems. With powerful graphics and stereo sound, there is no compromise in productivity features.

Whether its for a remote site or local use, the Netvoyager Neterm LX1000 plugs straight into your network and to your server-based computing infrastructure without any requirement for significant configuration.

A complete industry standard plug-n-play desktop solution which is user-friendly, requires no application installations and is virus protected.

A desktop solution with a very low total cost of ownership (TCO) and a high return on investment (RoI) ratio.
